

Call for Tutorials

The IEEE SMC 2023 conference will be preceded by tutorials on Sunday, October 1, 2023, addressing current and future topics in systems science and engineering, human-machine systems, and cybernetics from experts from academia, research institutes, and industry.

A tutorial is a compact presentation covering a specific topic, providing overview and clear and organized explanation of a set of ideas. It may be prepared and presented by one or more presenters.

The IEEE SMC 2023 conference organizers cordially invite everyone to submit a tutorial proposal. A proposal should include:

- (1) objective and structure,
- (2) expected attendance,
- (3) the list of speakers along with their short bio,
- (4) a statement explaining why the proposed topic is of high importance and would be highly attractive to the audience, and
- (5) the schedule for either 2-hours or 4-hours.

Tutorials in relevant and trendy areas - such as Telepresence, Virtual Reality/ Metaverse, and AI and Cybernetics – are strongly encouraged. However, any topics that are related to the theme of the conference are warmly welcome.

Anyone interested to organize a tutorial should download the following MS Word file in LETTER size

TEMPLATE for Tutorial Proposal

fill it, convert it as PDF and upload the generated PDF to the PaperCept Conference Management System on

SUBMISSION PAGE

available for submission of your proposal.

For more information about Tutorials, please contact **Tutorial Chair and Co-chair:**

Shun-Feng Su - sfsu@mail.ntust.edu.tw

Raffaele Carli – raffaele.carli@poliba.it

PLEASE NOTE:

Submission Deadline is **February 15, 2023**

Acceptance Notification of Tutorial will be announced by **March 1, 2023**
